

### Assignment 13.1

Scala application to find the GCD of two numbers.

GCD.scala

```
package Acad
```

```
object GCD
```

```
{
```

```
    def gcd(a:Int,b:Int):Int={
        if(b==0) a else gcd(b, a%b)
    }
```

```
def main(args:Array[String])
{
```

```
    Println (gcd(12,20))
```

```
}
```

```
}
```
